[linkedin.com/in/anthony-siletti](https://linkedin.com/in/anthony-siletti)

Full Stack Developer familiar with design and development processes for building web applications. Experienced in developer-client relationship during the design, development, test and deployment phase of projects and being meticulously organized during the process.

### TECHNICAL SKILLS

**Languages** – JavaScript, HTML, CSS, Python | **Libraries** – React, Node.js, Express.js, EJS, Axios, Bootstrap, Django | **Database** – MongoDB, Mongoose, PostgreSQL | **Others** – Restful Routing, MVC, JSON

### SOFTWARE DEVELOPMENT PROJECTS

#### **TaskTerminator**

- Developed a task management application using the Django framework to provide users with an efficient way to organize and prioritize daily tasks.
- Implemented features such as date-based task organization and email notifications for account and task updates.
- Utilized the Twilio API to enhance user experience by sending text message notifications on task creation, updates, and completion.

#### **ShopperTropper**

- Developed an ecommerce platform for a home goods store using Bootstrap, Node.js, Express, EJS, and MongoDB.
- Designed a clean user-friendly front end interface for easy navigation
- Utilized Google OAuth for user authentication and authorization to ensure secure access to the site.

#### **MasterCook**

- Developed a blog for users to create and share their favorite recipes and kitchen tips and tricks
- Developed an easily navigable user interface with React and Bootstrap
- Utilized JSON Web Tokens for user authentication and MongoDB Atlas to store created recipes and blog posts.

### EXPERIENCE

#### **Web Design and Development Intern**

**2020 - 2022**

##### *Lighthouse Guild, New York*

- Designed web pages with accessibility and SEO in mind that focused on a variety of topics related to Lighthouse Guild's mission to move forward the organization's goals.
- Built and sent out email campaigns to spread awareness of and create interest in different services offered by Lighthouse Guild.
- Cataloged and reported all discovered design oddities, bugs and unexpected/unusual points of interaction in the new theme for the Lighthouse Guild website.
- Identified common groups of block elements and text repeated throughout the website and created custom WordPress Blocks modeled after them to ensure consistency between web pages where used.

#### **Refund Cashier**

**2020 - Current**

### *Costco, New York*

- Processed returns for Costco members in an efficient and timely manner.
- Followed company policy to ensure the accuracy of returns to ensure item received and money refunded were accurate.
- Resolved customer issues by providing information and receipts regarding purchase issues and escalating issues to management when necessary.
- Assisted in signing up new customers to the Costco Membership program.

## **EDUCATION**

### **General Assembly**

**February 2023**

#### *Software Engineering Immersive Remote*

Full time student in the Software Engineering Immersive Remote course with over 480 hours of training in up-to-date technology stacks for web development.

### **John Jay College of Criminal Justice**

**December 2019**

#### *B.S., Computer Science and Information Security*

Honors in Computer Science and Information Security awarded at graduation: GPA 3.7/4.0
